Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 17-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Loud.

Loud shows a removal tool having an apertured housing 12, a swivel seat 16, an adjustable actuator 18,19, and an attacher 13. The intended use of the removal tool has not been accorded patentable weight. Inasmuch as hydraulic fittings exist in wide variety of shapes and sizes, a fitting could be found that would be commensurate with the size and shape of the seat, housing, and attacher such that the Loud tool could be used to retract a locking collar of a fitting.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Loud in view of Widmayer et al.

Widmayer et al shows that a grip may have an aperture to receive a lever.

To provide a socket in the Loud grip for receiving a lever would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Widmayer et al. One of ordinary skill in the art would have been

motivated to do this in order to provide a mechanical advantage in turning the grip/screw to make it easier to use the tool.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Loud in view of Kappler.

Kappler teaches that the head of the screw may have a socket to receive a ratchet wrench.

To provide a socket on the end of the screw/grip of Loud would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Kappler. One of ordinary skill in the art would have been motivated to do this in order to provide a mechanical advantage in turning the grip/screw to make it easier to use the tool.

Claims 29-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/23/05.
